

BWI is proud to be a Canadian manufacturer and supplier of living wall systems and fabric planters. Since 2005, we have been a leading provider of environmental solutions for clients in the energy, agricultural and construction sectors. We are an ISO 9001:2015 certified domestic manufacturer of a wide range of products.

LIVING WALL SYSTEMS AND FABRIC PLANTERS

Living Wall Planters are dynamic decorations that actively clean the air and reduce noise pollution, while creating a clean and aesthetically pleasing look for any indoor or outdoor space. Your plants will love the breathable fabric that promotes air pruning of root systems, leading to healthier plants and greater yields.

Available in the following sizes:

Triangle Hanger – 7 diameter x 12" Long

Small – 12x24" – 4 Pockets

Medium – 18x48" – 10 Pockets

Large – 18x67" – 16 Pockets

Advantages of Living Wall Systems & Fabric Planters

Excellent filtration and drainage properties.

Aeration of plant roots is constant, lowering the overall root temperature.

Multiple attachment points for easy installation on any indoor or outdoor wall.

Highly durable fabric can be reused multiple times and is machine washable, insect resistant, food safe & chemically inert.

Flexible fabric can be packed up tightly when not in use. Does not take up as much room as rigid pots.

Canadian Made to the highest quality standards in an ISO 9001:2015 facility.
